- Globally, the Net Employment Outlook for Q2 2024 is +22%, declining by -2% annually and -4% quarterly.
- Organizations in North America (+31%) reported the strongest hiring intentions, followed by Asia Pacific (+27%), Central and South Americas (+19%) and Europe, the Middle East, and Africa (+15%).
- The survey found the IT sector has the highest hiring Outlook globally, followed by Financials & Real Estate, and Healthcare & Life Sciences.

**MILWAUKEE, WI (March 12, 2024)** – Employer hiring intentions continue to moderate for the second quarter of 2024. According to the latest ManpowerGroup Employment Outlook Survey, the Net Employment Outlook (NEO) stands at +22% for Q2, down -2% year-over-year and -4% from Q1. The research is based on data collected from more than 40,000 employers in 42 countries between January 2-31, 2024.

“After years of the post-pandemic economy clicking along at breakneck speed, a cooldown was inevitable,” said ManpowerGroup Chairman and CEO Jonas Prising. “Still, demand remains strong for skilled talent. Given the global talent shortage, we expect hiring managers to get creative in this climate, whether it's upskilling current staff or through more targeted recruitment, as businesses gauge conditions over the coming months.”

Used internationally as a bellwether of economic and labor market trends, the NEO is calculated by subtracting the percentage of employers who anticipate reductions in staffing levels from those who plan to hire.

## ABOUT THE SURVEY

The ManpowerGroup Employment Outlook Survey is the most comprehensive, forward-looking employment survey of its kind, used globally as a key economic indicator. The Net Employment Outlook is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting a decrease in hiring activity.

## SURVEY METHODOLOGY

The methodology used to collect NEO data has been digitized in 42 markets for the Q2 2024 report. Survey responses were collected from January 2-31, 2024. Both the question asked and the respondent profile remain unchanged. The size of the organization and sector are standardized across all countries and territories to allow international comparisons.
