**EMBARGOED UNTIL SEPT. 11, 2018, AT 12:01 AM EST**

**U.S. Labor Market Shows No Sign of Cooling Down in Q4:  
Average Annual Hiring Outlook for 2018 the Strongest in a Decade**

- *Employers report +19% Employment Outlook in Q4 2018 capping off ten years of positive hiring intentions*
- *Most optimistic hiring intentions in Leisure & Hospitality (+28%), Professional & Business Services (+25%) and Transportation & Utilities (+24%)*
- *Double-digit Outlooks for all four U.S. regions - South, West, Midwest and Northeast*

**MILWAUKEE (Sept. 11)** — Employers across the U.S. plan to add staff in the next three months with a Net Employment Outlook of +19%, according to the latest ManpowerGroup (NYSE: MAN) Employment Outlook Survey. The survey of more than 11,500 U.S. employers reports the strongest average annual Outlook on record in the last decade with +19% anticipating growth.

All 13 industry sectors forecast optimistic hiring plans. The Outlook for Leisure & Hospitality is +28% - the strongest industry for 28 consecutive quarters as consumer confidence grows. Optimistic hiring intentions in Professional & Business Services (+25%) and Transportation & Utilities (+24%) reflect continued economic expansion and growth of online retail that's increasing the demand for drivers.

Hiring prospects in the South (+20%) are the strongest in 10 years driven by an uptick in Durable Goods Manufacturing (+18%). Employers in the Midwest region anticipate sustained hiring for the third consecutive quarter (+19%).

“August marked the 95<sup>th</sup> month in a row for job growth in the U.S. and we anticipate we'll hit 99 months by the end of the year as the Q4 Outlook has more good news for American jobseekers and businesses,” said Becky Frankiewicz, President of ManpowerGroup North America. “The labor market is getting back to pre-recession levels where the most optimistic Outlooks were reported in manufacturing, retail and professional services. It's a similar scenario today with a big difference - manufacturing is more advanced, retail has gone online, and employers in professional roles need a new combination of digital and soft skills. These are not the low-skilled jobs of the past, they are highly skilled technical roles of the future. In this competitive labor market, there is no better time for employers to help people upskill and develop in their careers. Creating a culture of learnability so that people are equipped and open to adapt is not just an operational imperative, it must be a strategic priority to build America's workforce for today and tomorrow.”
